

Science World: T rex Exhibit Questions

By Mumfection.com

Answer all questions to the best of your ability, point form is fine.

- 1) What was the most surprising, to you, feature of the baby T rex?
- 2) Once an adult, a full grown T rex can be; how big? How heavy? How long?
- 3) Where did the T rex actually have feathers?
- 4) What was one thing they got wrong about the T rex that they later had to fix?
- 5) What was the average lifespan of a T rex if they made it past their juvenile years?
- 6) What was one of the T rex's strongest senses? *(i.e. sight, smell etc...)*
- 7) Describe how the T rex's teeth grew in comparison to humans. What were the differences/similarities.
- 8) What are some of the T rex's relatives? *(feel free to collect pictures to answer this question)*
